

Aditya Chauhan

+91 8882448187 | aaditya143chauhan@gmail.com | [Linkdeln](#) | [Github](#)

Technical Skills

Languages: JavaScript, Python, C++, HTML/CSS

Frameworks & Libraries: Next.js, React.js, Django, Tailwind CSS, TensorFlow, OpenCV, Keras

Backend & APIs: Node.js, Express.js, REST APIs, Firebase

Databases: Firebase, MongoDB

Developer Tools: Git, VS Code, Microsoft Azure, AWS, Vercel

Other: AI Tools (GitHub Copilot, Claude for code optimization, FFmpeg, OpenAI Whisper)

Education

Vellore Institute of Technology, CGPA : 7.89

Bhopal, Madhya Pradesh

Bachelor of Technology in Computer Science (Specialisation in Cloud Computing)

August 2021 – October 2025

Class X Percentage : 83.2

June 2019

Class XII Percentage : 83.2

May 2021

Certifications

- AWS Architect Solution
- Foundation of Cyber security by Google
- The bits and Bytes of Computer Networking by Google
- The Assessment of basic CSS by Hacker Rank

Projects

ERP Management System | : HTML, CSS, JavaScript

January 2024 – March 2024

- Developed a centralized platform for managing academic and administrative resources.
- Improved navigation efficiency and data accessibility through enhanced UI/UX design.Optimized system capabilities to enhance accuracy by 30 percent, reduce load times by 15 percent, and decrease maintenance costs by 10 percent.
- Reduced system load times and maintenance costs by optimizing system capabilities.
- Streamlined administrative processes and boosted student record management efficiency.
- Enhanced communication capabilities for better collaboration within educational environments.

Whisper Transcriber – AI-Powered Audio & Video Transcription | Python, Open-AI Whisper, ffmpeg

May 2023 – July 2023

- Developed a transcription tool using Open-AI's Whisper to convert MP3, MP4, WAV, and other file formats into text.

- Integrated ffmpeg to handle various audio and video formats seamlessly
- Optimized processing speed and resource usage for improved performance. Designed a user-friendly CLI for easy file input and automatic transcription.

-technologies | Math AI Gesture Recognition System – AI Gesture Calculating Platform

Tech: Python, TensorFlow, Open-CV , Keras | September 2023 – December 2023

- Developed an AI-powered system to recognize and interpret mathematical gestures in real-time.
- Utilized computer vision techniques and neural networks for accurate gesture detection and classification.
- Enhanced user interaction by enabling hands-free control for solving mathematical problems.
- Integrated a responsive UI for seamless user experience and system adaptability.
- Achieved significant improvements in recognition accuracy and system performance through iterative model optimization.

InterviewR – AI Interview Preparation Platform

Tech: Next.js, React.js, Firebase, Tailwind CSS, Vapi AI | Feb 2025 – April 2025

- Built a voice-interactive AI platform to simulate real-time job interview scenarios using advanced voice agents.
- Integrated Vapi AI for natural language conversations and real-time feedback on user responses. Enhanced user interaction by enabling hands-free control for solving mathematical problems.
- Developed a responsive, modern UI with Tailwind CSS to ensure a smooth and professional user experience. Achieved significant improvements in recognition accuracy and system performance through iterative model optimization.
- Implemented Firebase for scalable back-end services, user authentication, and data storage.
- Continuously improved user experience and AI feedback accuracy through user testing and iteration.

Full Stack Task Management App

Tech: Next.js, React.js, Node.js, Express.js, MongoDB | April 2025 – May 2025

- Developed a full-stack task management application with user authentication and CRUD functionality
- Designed REST APIs using Node.js and Express.js and integrated them with the frontend
- Implemented role-based access and task status tracking
- Deployed the application on Vercel with backend services on Render

Experience

Industrial Training – IT Department, Prasar Bharati (All India Radio – Akashvani) | March 2025 – May 2025

- Assisted the IT team in network management, troubleshooting, and maintaining internal broadcast systems.
- Gained hands-on exposure to real-world IT infrastructure, system operations, and daily technical workflows.
- Built a Virtual Interview System involving frontend UI, backend logic, and audio/video handling
- This **Virtual Interview System**, including designing the interview flow, integrating video/audio response recording, and building the frontend + backend logic. Collaborated with mentors to enhance functionality, test usability, and deliver a working prototype.

Externship – Attendance Tracker Project, Sopra Steria India | June 10, 2025 – July 28, 2025

- Developed an Attendance Tracker system as part of B.Tech project using production-oriented development practices.
- Worked under the mentorship of a Product Consultant, following real-world software development workflows and standards.

- Contributed to backend logic, feature implementation, and system validation for accurate attendance management.
- Gained hands-on exposure to enterprise-level project execution, documentation, and team collaboration.
- Ensured performance, reliability, and clean code structure throughout the project lifecycle.

Internship – Python & Django Developer, Indycium | June 31, 2025 – Present

- Developed and optimized backend APIs using Django REST Framework
- Integrated frontend components with backend services for seamless data flow
- Collaborated with full-stack developers to design scalable and maintainable systems
- Participated in code reviews, debugging, and performance optimization

Objective

- Demonstrates exceptional personal integrity and the ability to build trust through clear and effective communication.
- Strong team-building and motivational skills, fostering collaboration to achieve outstanding business outcomes.
- Proficient in handling requirement gathering, technical discussions, and customer interactions independently.
- Adept at managing tasks in high-pressure environments while meeting strict deadlines with efficiency.
- Flexible and adaptable to diverse work conditions and dynamic project needs.

Extracurricular

- Led the college volleyball team, fostering teamwork and competitive spirit, resulting in a 20 percent improvement in match performance and Secured the runner-up position in the intramural tournament • Contributed to over 10 collaborative projects, enhancing knowledge and practical skills in cloud environment projects and enhancing knowledge in cloud technologies and solutions
- Demonstrated leadership and coordination skills, managing a team of 50 participants and facilitating a successful MUN event in 2018
- Coordinated logistics and led a team of volunteers for a campus-wide cultural festival, attracting over 120 attendees and promoting diversity and inclusion
- Passionate about playing musical instruments as a creative pursuit, currently learning guitar
